VeriTrust AI -- Forensic Evidence Report

Evidence ID: EV-2026-09AAD8 | Report ID: RPT-2026-0862537B

VERITRUST AI -- FORENSIC EVIDENCE ANALYSIS REPORT

Generated: 2026-11-05T06:37:31.862730+00:00
Schema Version: veritrust-report-v1

1. EVIDENCE IDENTIFICATION

Evidence ID: EV-2026-09AAD8
Original Filename: uav_patrol_recon_live_demo.mp4
File Size: 24,684 bytes
MIME Type: video/mp4
Uploaded At: 2026-11-05T06:37:31
Registered At: 2026-11-05T06:37:31
Evidence Status: verified

2. CRYPTOGRAPHIC FINGERPRINT

Algorithm: SHA-256
Registered Hash: a978bdeb0102abc137642d98eae1d389eec8f3c3953d0d4266d3ea04246ef8a6
Recalculated Hash: a978bdeb0102abc137642d98eae1d389eec8f3c3953d0d4266d3ea04246ef8a6
Hash Match: True
Integrity Status: verified
Verified At: 2026-11-05T06:37:32

IMPORTANT: A matching SHA-256 hash confirms the file has not changed
since registration. It does not prove the original content was truthful.

3. DIGITAL SIGNATURE

Algorithm: Ed25519
Signature Valid: True
Public Key: 393e458879077df3a503129b87e8c9c0... (truncated for display)
Signed At: 2026-11-05T06:37:31

4. AI DEEPFAKE ANALYSIS

Model: VeriFace AI Deepfake Detector
Model Version: veritrust-veriface-v1
Analysis Status: completed
Result Category: analysis_unavailable
Confidence Score: N/A
Frames Analyzed: 15
Suspicious Frames: N/A
Inference Time: 0.02 seconds

LIMITATIONS:
This model assesses the probability of manipulation based on learned visual patterns. A low manipulation score does not confirm authenticity. The model may not detect all manipulation techniques, particularly novel methods. Results should be interpreted by a qualified reviewer.

IMPORTANT: AI analysis results are assessments, not proof of manipulation or authenticity.

5. BLOCKCHAIN REGISTRATION

Status: unavailable

Network: local
Event Type: EVIDENCE_REGISTERED
Transaction Hash: Not registered
Block Number: N/A
Error: Blockchain network is not available. Configure BLOCKCHAIN_ENABLED=true and ensure the local Hardhat node is running to enable on-chain registration.

6. CHAIN OF CUSTODY

[1] 2026-11-05T06:37:31 | UPLOADED
Actor: Senior Inspector Sharma (investigator)
Notes: File uploaded: uav_patrol_recon_live_demo.mp4

[2] 2026-11-05T06:37:31 | REGISTERED
Actor: Senior Inspector Sharma (investigator)
Notes: SHA-256 computed, manifest signed, blockchain registration attempted.

[3] 2026-11-05T06:37:31 | REGISTERED
Actor: Senior Inspector Sharma (investigator)
Notes: Blockchain registration attempted. Status: unavailable

[4] 2026-11-05T06:37:32 | VERIFIED
Actor: Senior Inspector Sharma (investigator)
Notes: Integrity verification: verified

[5] 2026-11-05T06:37:32 | VERIFIED
Actor: Senior Inspector Sharma (investigator)
Notes: Integrity verification: mismatch

[6] 2026-11-05T06:37:32 | VERIFIED
Actor: Senior Inspector Sharma (investigator)
Notes: Integrity verification: verified

7. CONCLUSION AND LIMITATIONS

This report documents the results of automated verification checks
performed by VeriTrust AI. It is intended for academic demonstration
and research purposes.

The following checks were performed:
• SHA-256 Integrity: verified
• Digital Signature: True
• AI Analysis: analysis_unavailable
• Blockchain: unavailable

DISCLAIMER: This report is an academic software demonstration.
It is not a substitute for professional digital forensic examination.
AI-based detection, cryptographic hashing, and blockchain registration
each address different questions and must not be conflated.
Human expert review is required before any forensic conclusions are drawn.

END OF REPORT -- VeriTrust AI v1.0.0
