VeriTrust AI — Forensic Evidence Report

Evidence ID: EV-2026-CCTV03 | Report ID: RPT-2026-CCTV03

VERITRUST AI — FORENSIC EVIDENCE ANALYSIS REPORT

Generated: 2026-11-05T05:42:01.766262+00:00
Schema Version: veritrust-report-v1

1. EVIDENCE IDENTIFICATION

Evidence ID: EV-2026-CCTV03
Original Filename: surveillance_gate4_entrance.mp4
File Size: 65,703 bytes
MIME Type: video/mp4
Uploaded At: 2026-11-04T23:42:02
Registered At: 2026-11-05T00:42:02
Evidence Status: verified

2. CRYPTOGRAPHIC FINGERPRINT

Algorithm: SHA-256
Registered Hash: 56315b656ac75a7223db001420feebe859c950f28fd673d935a134c72b047683
Recalculated Hash: 56315b656ac75a7223db001420feebe859c950f28fd673d935a134c72b047683
Hash Match: True
Integrity Status: verified
Verified At: 2026-11-05T05:42:02

IMPORTANT: A matching SHA-256 hash confirms the file has not changed
since registration. It does not prove the original content was truthful.

3. DIGITAL SIGNATURE

Algorithm: Ed25519
Signature Valid: True
Public Key: 393e458879077df3a503129b87e8c9c0... (truncated for display)
Signed At: 2026-11-05T05:42:02

4. AI DEEPFAKE ANALYSIS

Model: VeriFace AI Deepfake Detector
Model Version: veritrust-veriface-v1
Analysis Status: completed
Result Category: inconclusive
Confidence Score: 0.48
Frames Analyzed: 30
Suspicious Frames: 1
Inference Time: 1.65 seconds

LIMITATIONS:
Analysis reflects probabilistic visual pattern matching. Low scores do not guarantee natural authenticity. Human forensic review required.

IMPORTANT: AI analysis results are assessments, not proof of manipulation or authenticity.

5. BLOCKCHAIN REGISTRATION

Status: confirmed
Network: local-hardhat

Event Type: EVIDENCE_REGISTERED
Transaction Hash: 0xf8c9ea68e2a37b144140488725f2aea9ab32ac981c8b2c6cb0253143b1b72215
Block Number: 104931
Error: None

6. CHAIN OF CUSTODY

[1] 2026-11-05T05:42:02 | UPLOADED
Actor: Senior Inspector Sharma (investigator)
Notes: Initial upload of surveillance_gate4_entrance.mp4

[2] 2026-11-05T05:42:02 | REGISTERED
Actor: Senior Inspector Sharma (investigator)
Notes: SHA-256 computed, manifest digitally signed with Ed25519
TX: 0xf8c9ea68e2a37b144140488725f2aea9ab32ac981c8b2c6cb0253143b1b72215

[3] 2026-11-05T05:42:02 | ANALYZED
Actor: Mr. S. K. Shrivastav (ceo)
Notes: VeriFace AI deepfake detection executed. Result: inconclusive

[4] 2026-11-05T05:42:02 | VERIFIED
Actor: Senior Inspector Sharma (investigator)
Notes: Cryptographic integrity match verified (100% bit-level consistency)

7. CONCLUSION AND LIMITATIONS

This report documents the results of automated verification checks
performed by VeriTrust AI. It is intended for academic demonstration
and research purposes.

The following checks were performed:
• SHA-256 Integrity: verified
• Digital Signature: True
• AI Analysis: inconclusive
• Blockchain: confirmed

DISCLAIMER: This report is an academic software demonstration.
It is not a substitute for professional digital forensic examination.
AI-based detection, cryptographic hashing, and blockchain registration
each address different questions and must not be conflated.
Human expert review is required before any forensic conclusions are drawn.

END OF REPORT — VeriTrust AI v1.0.0
