VeriTrust AI — Forensic Evidence Report

Evidence ID: EV-2026-CONF02 | Report ID: RPT-2026-CONF02

VERITRUST AI — FORENSIC EVIDENCE ANALYSIS REPORT

Generated: 2026-11-05T05:42:01.610498+00:00
Schema Version: veritrust-report-v1

1. EVIDENCE IDENTIFICATION

Evidence ID: EV-2026-CONF02
Original Filename: press_conference_speech_sample.mp4
File Size: 65,706 bytes
MIME Type: video/mp4
Uploaded At: 2026-11-04T23:42:02
Registered At: 2026-11-05T00:42:02
Evidence Status: verified

2. CRYPTOGRAPHIC FINGERPRINT

Algorithm: SHA-256
Registered Hash: db74636967739eec0eab2d8371341c12ccf65310e56e92e82f8ec28bbc85b490
Recalculated Hash: db74636967739eec0eab2d8371341c12ccf65310e56e92e82f8ec28bbc85b490
Hash Match: True
Integrity Status: verified
Verified At: 2026-11-05T05:42:02

IMPORTANT: A matching SHA-256 hash confirms the file has not changed
since registration. It does not prove the original content was truthful.

3. DIGITAL SIGNATURE

Algorithm: Ed25519
Signature Valid: True
Public Key: 393e458879077df3a503129b87e8c9c0... (truncated for display)
Signed At: 2026-11-05T05:42:02

4. AI DEEPFAKE ANALYSIS

Model: VeriFace AI Deepfake Detector
Model Version: veritrust-veriface-v1
Analysis Status: completed
Result Category: potentially_manipulated
Confidence Score: 0.88
Frames Analyzed: 30
Suspicious Frames: 26
Inference Time: 1.65 seconds

LIMITATIONS:
Analysis reflects probabilistic visual pattern matching. Low scores do not guarantee natural authenticity. Human forensic review required.

IMPORTANT: AI analysis results are assessments, not proof of manipulation or authenticity.

5. BLOCKCHAIN REGISTRATION

Status: confirmed
Network: local-hardhat

Event Type: EVIDENCE_REGISTERED
Transaction Hash: 0xc51d062498c36e1cdfc553a21f7ac15aaf09eca00ee2ab48f6ca784631818689
Block Number: 104930
Error: None

6. CHAIN OF CUSTODY

[1] 2026-11-05T05:42:02 | UPLOADED
Actor: Mr. S. K. Shrivastav (ceo)
Notes: Initial upload of press_conference_speech_sample.mp4

[2] 2026-11-05T05:42:02 | REGISTERED
Actor: Mr. S. K. Shrivastav (ceo)
Notes: SHA-256 computed, manifest digitally signed with Ed25519
TX: 0xc51d062498c36e1cdfc553a21f7ac15aaf09eca00ee2ab48f6ca784631818689

[3] 2026-11-05T05:42:02 | ANALYZED
Actor: Mr. S. K. Shrivastav (ceo)
Notes: VeriFace AI deepfake detection executed. Result: potentially_manipulated

[4] 2026-11-05T05:42:02 | VERIFIED
Actor: Senior Inspector Sharma (investigator)
Notes: Cryptographic integrity match verified (100% bit-level consistency)

7. CONCLUSION AND LIMITATIONS

This report documents the results of automated verification checks
performed by VeriTrust AI. It is intended for academic demonstration
and research purposes.

The following checks were performed:
• SHA-256 Integrity: verified
• Digital Signature: True
• AI Analysis: potentially_manipulated
• Blockchain: confirmed

DISCLAIMER: This report is an academic software demonstration.
It is not a substitute for professional digital forensic examination.
AI-based detection, cryptographic hashing, and blockchain registration
each address different questions and must not be conflated.
Human expert review is required before any forensic conclusions are drawn.

END OF REPORT — VeriTrust AI v1.0.0
